SUMIT KUMAR

github.com/Sumitkr28
linkedin.com/in/sumit-kumar2812

Computer Science undergraduate with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming. Skilled in Python, machine learning, and data analysis with experience in AI agents, LLM-based applications, and scalable backend systems. A quick learner eager to build scalable AI systems and data-driven solutions.

Skills

AI & Machine Learning: Deep Learning, Supervised Learning, Model Evaluation, Prompt Engineering, Predictive Modeling

GenAI & LLMs: AI Agents, MCP Server, RAG Pipelines, Agent Orchestration, LLM Integration (Claude, LLaMA), Embeddings, FAISS

Python & Libraries: Python, NumPy, Pandas, Scikit-learn, TensorFlow, XGBoost, LangChain, Sentence Transformers, Flask

AI Systems & Backend: API Development & Testing, Scalable AI Pipelines, API Design, Tool Calling, CI/CD, Backend Integration

Data Science: Exploratory Data Analysis (EDA), Statistical Analysis, Data Processing, Data Visualization, Workflow Automation

Cloud, Security & Tools: AWS (S3, EC2), Docker, Kubernetes, Git, GitHub, OAuth2.1, RBAC, SPIFFE, mTLS, Context Management

Work Experience

AI & Machine Learning Intern | Kloud Technology Works Pvt Ltd — **March 2026 – Present**
Technologies used: Python, API Development & Testing, OAuth2.1, LLM Integration, AI Agent, SPIFFE, mTLS, MCP Server

- Designed and developed AI agent workflows using MCP server integrated with Claude AI for automation and task execution.
- Built secure backend APIs on AuthSec.ai and AuthNull using OAuth2.1 and mTLS, handling 5K+ requests/day.
- Implemented SPIFFE-based identity, improving service authentication efficiency by 30%.
- Integrated LLM pipelines, reducing response latency by 25% and improving task accuracy.

Projects

Malicious URL Detection using ML | GitHub — **January 2026**
Technologies used: Python, Scikit-learn, XGBoost, NumPy, Pandas, Streamlit

- Built a stacking ensemble model (Logistic Regression, Random Forest, XGBoost) achieving 95%+ precision in detecting malicious URLs.
- Engineered 20+ URL-based features (IP presence, URL length, suspicious keywords, directory depth) to enhance model.
- Developed and deployed a Streamlit-based web app for real-time URL prediction with user-friendly insights.

RAG-Based LLM Chatbot using LLaMA | GitHub — **November 2025**
Technologies used: Python, Flask, FAISS, Sentence Transformers, LLaMA (Groq)

- Built a RAG-based chatbot using LLaMA, enabling context-aware Q&A over 5+ data sources (PDFs, URLs, TXT, YouTube, Audio).
- Indexed 10K+ text chunks using FAISS and semantic embeddings, enabling efficient top-K retrieval with sub-second latency.
- Reduced LLM hallucinations by 40%+ via retrieval-grounded responses and deployed the solution as a Flask-based REST API for production use.

Credit Card Fraud Detection | GitHub — **August 2025**
Technologies used: Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel

- Built ML classification and regression models with cross-validation achieving 90%+ precision on imbalanced datasets.
- Performed exploratory data analysis (EDA) to uncover trends, patterns, and outliers.
- Created visual dashboards using Matplotlib and Power BI to present fraud trends.

Education

Greater Noida Institute of Technology, Greater Noida — 2022–2026
Bachelor of Technology (B.Tech) in Computer Science and Engineering

Certifications

E&ICT Academy, IIT Kanpur: Data Structure and Algorithms | Certificate — July 2025
E&ICT Academy, IIT Kanpur: Data Science with Python | Certificate — August 2025
IBM: Artificial Intelligence Fundamentals | Certificate — October 2025
Deloitte: Data Analytics Job Simulation (Forage) | Certificate — January 2026
JPMorgan Chase & Co.: Software Engineering Job Simulation (Forage) | Certificate — January 2026
